

DISA-CLEAN 130 Waterless dust free high vacuum sweeper.

Developed to meet EU legal requirements that apply to remove the concentration of harmful PM10 particles in cities and industries.

Our philosophy is simple and based on the way it's done in your home where you do not wet the floors before vacuuming or brush. You have to vacuum the floors first.

DISA-CLEAN vacuum sweeper combines brushing and vacuuming in one operation without the addition of water. This method makes DISA-CLEAN a favorite.

DISA-CLEAN gives you a completely clean and dust-free street/surface.

- With DISA-CLEAN you get the proven incredible dust free vacuum sweeping performance and pick up all the particles from the street/surface. Even smaller particles than PM 10 particles is sucked up and DISA-CLEAN don't blow them out in the air again.
- DISA-CLEAN gives you total control of dust. The new system with high performance vacuum pump and unique 4-step filter separation keep the airflow through the container/filter at maximum capacity during the entire operation.
- The extremely superior results you get by DISA-CLEAN sweeper, is because of the vacuum encapsulated brushes together with a *unique vacuum nozzle that both vacuum sets and suck up* even the finest material from the surface. Which also provides an extremely high working speed.
- With the advantages of high vacuum technique the DISA-CLEAN is very efficient even when the surface is dirty and wet.

Cleaning without water gives you the results:

- No "painting" of the surface with the smallest particles which is the result of conventional machines, since they add water to reduce swirling of dust in the air.
- Sweeping even during wintertime.
- Increased productivity means spend less time on cleaning and service of the machine.
- A control system allows the operator to focus on the road and the safety.
- As it's a DISAB product, you can even use it as a Vacloader with hose and nozzle.

WHAT IS PM10?

PM10-2,5 is airborne particles = Deadly Dust !

RESULTS WITH DISA-CLEAN 130

Surface after DISA-CLEAN 130 5-10 % PM 10 left

Surface after traditional Sweeper 95% PM 10 left

DISA-CLEAN 130 OFFERS

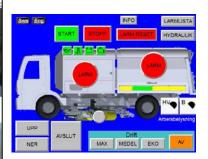

"Vacuum at street/surface level"

- High Vacuum performance
- Dust free, water free cleaning
- High capacity without compromising with the result
- Helps Europe to reach PM-10 objectives

DISA-CLEAN CONTROL SYSTEM

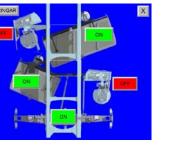

The control system allows you to

- Easy operation on touch screen
- Programmed sequences for easy use "One touch command"
 - Start cleaning
 - Stop cleaning
- View data from auxiliary engine, vacuum pump and filters
- Hydraulics control

AUTOMATIC FILTER SYSTEM

Control filters:

Clean the outgoing air down to PM 2.5

Main filters:

Automatic filter cleaning

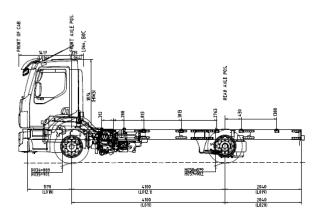

GENERAL SPECIFICATIONS

Truck Chassis Wheel base: 4.30 m Front axle 7,1 ton Axle pressure: Rear axle: 13 ton Donkey Engine for High Vacuum Pump Model: Turbo, 4-cylinder (Step III B) 129 kW ISO3046 Output: Full Width Nozzle with Ventilated and Built in Brushes Sweep width: Main brushes 2500 mm Optional: Side brush right Side brush left Total swept width: 3100 mm Function: Hydraulic and Pneumatic Sweeping speeds: 0-20 km/h Pay Load volume: Approx. 5000 liter
