Having a clean parking lot projects an image of success, and people prefer to patronize the successful. A parking lot cluttered with debris can take away from even the most beautiful landscaping. Sand, dirt and other trash are abrasive. They will shorten the life of pavement, as well as the service time of any seal coating, striping, etc. Sweeping your parking area on a regular basis can help to minimize pollutants in your storm water stream. When your parking area is clean to begin with, shoppers are less likely to throw trash out of their cars when they come to shop.
