## Start up of a new production site for Jungojet 3500

*Hecker & Brian delivers the first Jungojet 3500 out of the Eppingen plant*

**Eppingen, 25. August 2009:** In June 2009 the start up of an assembly and training center in Scheuerlesstrasse 42/1, Eppingen took place. Main product is the multi purpose vehicle Jungojet 3500 which can be equipped for sweeping, winter maintenance, green belt care and a dumper for transport. The Jungojet 3500 is designed for municipalities, service providers and industrial clients with fast changing requirements. It takes only a few minutes to change from p.e. winter maintenance to sweeping equipment. Various accessories open many new application fields for the users and enables them an economical improvement in productivity and an optimized mechanization of local tasks. All clients confirm that the higher productivity and the extended utilization

covers for a cost reduction.

The large efficiency and simple operation is unique in this class. The Jungojet 3500 is sold for a short time on the German market and a sales network in Europe is developed. The sales revenues exceed expectations.
