MODEL 600® COMDEX®
Street Sweeper

Because *swept* is not always clean, contact **TYMCO**. We offer a wide variety of Regenerative Air Street and Parking Lot Sweepers to meet

your needs. Regenerative Air sweepers blast into pavement cracks with up to a 250 mph controlled jet of air, forcing up even the finest sand and particulates into a totally enclosed system - never exhausting dirty air as vacuum sweepers do. All with only a few moving parts reducing maintenance cost and downtime.

Arrange a demonstration today!

Lower your fuel
consumption

Introducing the new GX12 & DF12 Parking Area Sweepers from Victory

Mounted on the 109 inch wheelbase Isuzu NPR 12,000 LB GVWR cab-forward chassis, the GX12 & DF12 can easily pick-up general parking lot litter while reducing operating and procurement costs. These sweepers include our large 4.35 cubic yard stainless steel hopper, full-width reverse sweep pick-up head with our exclusive "HOODS-UP" feature, massive 39 inch vertical steel gutter broom with in-cab remote tilt, 105-gallon dust control system, 26 inch diameter Hardox steel blower fan with 5-year wearout warranty, dual hopper inspection doors and massive Aluminum rear tool storage boxes. For additional information or to arrange a demonstration, please visit www.victorysweepers.com or call us at (844) 479-3373.

Model GX12 - Honda 24.9 hp gas auxiliary engine

Model DF12 - Isuzu 23.9 hp diesel auxiliary engine

Reduce your SWEEPING COSTS

WITH MOBIL-SWEEPER

GET Top Performance AT LOWER COST!

Discover new ways to save money on street sweeping, airport sweeping, and highway sanitation with the big Mobil-Sweeper. Savings of 43% over all previous methods of street sanitation are being reported by Mobil-Sweeper users. Learn more about what Mobil-Sweeper can do for you on actual experiences with this line sweeper. Many communities say maintenance and upkeep costs are the lowest on record. Mileage requirements are lower too. Mobil-Sweeper can change street sanitation into a money job. Traveling from the dump at top traffic speeds, Mobil-Sweeper eliminates need for a truck and pickup crew to follow. Where central dumping is used, Mobil-Sweeper's big hopper capacity makes it a top performer in this system. You can't overlook safety—a covered cab with shatter-proof windshield gives protection to your operator... places him in a position for better visibility—as attested by leading automotive engineers. Four wheel hydraulic brakes are a must on heavily loaded vehicles—Mobil-Sweeper has them.

**Congratulations to David Ross
and his Millennium Maintenance
and Power Sweeping for being
chosen as PAVEMENT magazine's
Contractor of the Year for 2022!**

Ross is also on the World Sweeping Association's Advisory Board and a strong supporter of WSA. Isn't it time you took a look at WSA's \$350/year Membership?

**Go to
www.WorldSweepingPros.org/whyjoin
to find out more.**

DESCO MFG., INC.

D600SC -

Our D600SC was the
FIRST HYDRAULIC

RAPWRANGLER

1. Incoming RAP enters the 30" X 42" receiving hopper (22" X 36" on 10HP Model)

2. The breaker plate forces asphalt material against the spinning rotor in the crushing chamber

3. A bypass spring allows reject material to be ejected from the chamber

3 MODELS TO FIT YOUR TONNAGE REQUIREMENTS

4. RAP is milled to 1" diameter or less

The 10HP processes between 40 to 60 tons of Rap per hour

The 30HP processes up to 210 tons of Rap per hour

The 50HP processes up to 250 tons of Rap per hour

The RAPWRANGLER is a portable crushing machine that renders football-sized chunks of asphalt to suitable gradations of 1-inch diameter or less at a rate of up to 250 tons per hour for introduction to drum mixers or batch plants.

First, a conveyor drops chunks of asphalt material into the 30-by 42-inch receiving hopper. The hopper allows material to fall to a crushing chamber where a 20-inch rotor spins at 127 rotations per minute. Depending on the producer's needs, a 10, 30 or 50-horsepower TEFC motor powers the class 2 shaft mount reducer in the crushing/milling chamber. As material falls from the hopper, a gradation-adjustable breaker plate of 1/2-inch AR450

steel pushes the material that is inside the chamber against the spinning rotor, which boasts 312 replaceable tungsten-tipped milling teeth. Here, a bypass spring allows foreign material such as hard concrete, up to 4 inches, to be ejected from the chamber. A discharge conveyor carries this away.

At the base of the chamber, a fixed row of replaceable milling teeth mounted on the bottom section of the breaker plate grinds asphalt material further.

When material has reached the desired gradation, it falls through the base opening to a waiting shaker screen, which sizes material before sending it to another conveyor for transfer to the RAP collar on the drum
